

This free cover comes to you with the compliments of the Space City Cover Society and Hans Groth of Switzerland. Hans had these most beautifully engraved covers made in Switzerland and we hope that you will take pleasure in adding it to your space collection.

For those of you that are not familiar with the Space City Cover Society, we have given a brief background of our activities on the back side of this note. We might add that we were the first to do space covers from Houston, and many collectors have now come to regard Houston as the appropriate **cancel**, once "lift-off" has been made. As you know, the minute lift-off is made, Houston Manned Space Craft Center has all control of the space flight.

In addition to space covers. The SCCS has had several space medals minted from .999 silver, numbered, 33 mm in diameter and 15 grams in weight. More details about these on request from you. Let us hear from you and we feel you will be more than satisfied with both our covers and our service. Our latest medal, the one for Apollo 13 is shown at the left.
