SPACE CITY
future space colony

APOLLO 11 35th ANNIV
1969 July 20 2004

In the 1980s SCCS helped form "SPACE CITY", future space colony. It was organized to help set up private space agencies departments such as a postal system.

One of the types of space covers it produces includes overprinted U.S. postage stamps with "SPACE CITY". This is allowable but the stamps can't be used in the U.S. mails nor can they contain a U.S. postal marking.

As a result the entity has it's own "SPACE CITY" postmark and collectors have supported this facility over the years.

One of the most popular set of covers offered previously was the set of three for the STS-107 Columbia Crew Perishes on Feb 1, 2003.

JULY 20, 2004 35th ANNIVERSARY OF APOLLO 11

The rush is on for Apollo items and covers for Apollo 11 lead the pack. Especially since President Bush has announced his new program "BACK TO THE MOON AND ON TO MARS" And all who order from this Apollo 11 mailing will be sent (in a couple of weeks) all of the news in detail of the new U.S. space program. And with the free issues of THE SPACE LOG we will keep you up-to-date on all future happenings of the new U.S. space activity.

APOLLO 11 LANDING

FIRST MEN ON THE MOON

"Man's greatest adventure." That is how the New York Times described the U. S. Apollo mission that enabled Neil Armstrong and Edwin E. Aldrin, Jr. to become the first two people in history to walk on the moon's "forbidding surface." And orbiting above them, about 65 miles, was Lunar Module Pilot Michael Collins.

The time was 4:17 p.m.E.D.T. when the Eagle touched down on the surface of the moon. The date was July 20, 1969. Then Armstrong beamed back to Mission Control, "Houston, Tranquillity base here. The Eagle has landed." The event that the world was waiting for took place at 10:56 p.m.E.D.T. July 20, 1969. Neil A. Armstrong "stepped into history." Reaching the bottom rung of the ladder leading down from Apollo 11's landing craft, he reached out his booted left foot and planted the first human footprint on the moon.

As his foot set itself on the moon, Armstrong let Mission Control and the world hear words now immortalized: "That's one small step for man, one giant leap for mankind."

Apollo 11 was not just another space flight. This one was being called the "big one" worldwide. It was the climax of a "decade of work and a score of preparatory missions."

It was July 16, 1969 at 9:32 a.m.E.D.T. when the Apollo 11 spacecraft aboard a Saturn 5 rocket, blasted off Pad 39-A at Kennedy Space Center, Florida. The crew was on its way to the moon on an eight day, 500,000 mile journey.

While on the moon, President Nixon marked this momentous occasion by a telephone-radio hook-up from the oval office in the White House to the astronauts standing in front of their spacecraft on the moon. In part Nixon congratulated them with, "For one priceless moment in the whole history of man, all the people on this earth are truly one-one in their pride in what you have done and one in our prayers that you will return safely to earth."

Armstrong replied, "Thank you Mr. President. It's an honor and privilege for us to be here representing not only the United States but men of peace of all nations, men with interests and a curiosity and men with a vision for the future."

Before ending man's first walk on the moon, which lasted two hours and 21 minutes, astronauts Armstrong and Aldrin left a plaque on the moon. It read in part, "We Came in Peace For All Mankind." Total time on the moon by the pair was 21 hours and 38 minutes.
